

Maximum Processing and e2Value Form Alliance

Stingray System functionality to include real-time property valuation information

Bradenton, FL –Maximum Processing today announced a new alliance with e2Value, to integrate its real-time property valuation service into The Stingray System, a fully functional web-based property & casualty insurance administration solution.

“In order to improve the ability for hands-free processing of risks and to facilitate accurate underwriting decisions, carriers require real-time, property valuation information,” says Sean Pitcher, President and CEO of Maximum Processing. “The Stingray System has addressed this problem by expanding our integration to include e2Value's real-time property valuation reports into our Web-based administration solution,” explains Pitcher.

“Until e2Value, there was no single standardized system to accurately and quickly determine replacement cost values. We are pleased with this alliance to continue expanding our service to additional carriers. Easy data integration is leading us to be the valuation provider of choice,” said Todd W. Rissel, chairman and CEO of e2Value, Inc.

“Maximum Processing is committed to improving the functionality of its products so carriers can have the latest features while providing their underwriters and agents with the ability to process business in a more efficient and economical manner,” continued Sean Pitcher. “This alliance with e2Value demonstrates our continuing commitment to the users of The Stingray System.”

The Stingray System is a policy, billing, claims and reinsurance administration system which provides workflow, imaging, many third party interfaces (e.g. Credit Card, General Ledger, Comparative Raters, CLUE, bureau stat reporting and others) . It comes with consumer and agent portals as well a full point of sale system.
